- ### Care Pathway Development
- Evolution of ProvenCare®, a system approach to population management
 - Research current literature, national guidelines and GHS data
 - Best Practice Clinical Consensus
 - Safety
 - Reduce unwarranted variation
 - Education
 - Collaboration
 - Process evaluation and transformation
 - Empowered to drive real change
 - Robust reporting capabilities
 - Aligned incentives: patient, provider, payer
- Geisinger

Features of Successful Payer-Provider Partnerships

ACHP'S RESEARCH IDENTIFIED 5 BEST PRACTICES THAT HEALTH PLANS CAN EMPLOY TO ACCELERATE THE ADOPTION OF EVIDENCE-BASED CARE.

1. **Build** consensus and commitment to change
2. **Create** a multi-disciplinary team that includes the necessary skill sets, perspectives and staff roles
3. **Customize** education, tools and access to specialized knowledge for physicians and for patients
4. **Share** timely and accurate data and feedback in a culture of transparency, accountability and healthy competition
5. **Align** financial investments with clinical and patient experience goals

MAKING HEALTH CARE BETTER

Hepatitis C: Managing Total Cost of Care

- “Cure” rates GHP/GHS COE=99.7%
- “Cure” national comparison rates: 85%-90%
- “Cure” rate for GHP/nonGHS ~ 50-70% (manual)
- Process monitors physician compliance of CarePath
- The large volume of cases within the COE has allowed us to determine/tailor:
 - The optimal drugs for treatment
 - The optimal duration of treatment
- Both of these result in lower total cost of care

Geisinger <https://catalyst.nejm.org/geisinger-provencare-hcv-cure/> 6

Hepatitis C Lessons Learned

- A total cost of care, collaborative approach brings higher value
- Patients receive higher quality care
- The total cost of care is decreased
- The goal is to provide this level of care to all patients
 - Scale Center of Excellence by adding capacity and sites
 - Redesign benefits to drive members to Center of Excellence
