

Transforming Care Delivery: Steady Progress to Achieve Bold Goals

Jaewon Ryu, MD, JD
CEO, Risant Health

Value-based care as a better path

From designing around the health system to designing around our patients

Illustrative impact of value-based care models

Prioritizing within a population leads to earlier diagnosis of cancer

20% relative reduction in rate of Stage IV colon cancer

Focusing on prevention reduces the incidence of worsening disease and complications

33% less likely to die from heart disease

20% less likely to die from cancer

Optimizing capacity provides more timely care, better outcomes, and greater affordability

4-6% relative reduction in specialty referral rates

45% decrease in ED boarding hours

To get there, we need transformational goals
with incremental steps, including investment
